DESCRIPTION

Extreme conditions require extreme airguns, and the latest from Daystate takes their electronic line to this Extreme! Technically the most advanced air rifle ever, the Air Wolf MCT contains a new cutting edge technology to create an excellent high power precharged air rifle. The MCT rifles contain electronic sensors to shot count and to improve consistency. The onboard LCD screen displays pressure, shot counter, magazine counter as well as remaining air pressure. The efficient electronic firing system combined with a 480cc carbon fiber bottle results in a huge shot capacity at high power. The trigger is smooth and crisp, and cycles with zero effort. The attached Huggett silencer takes this powerhouse down to nearly nothing in the noise department, making it both powerful and silent. The Air Wolf Extreme is perfect for slamming long range targets, with consistency and accuracy for the demanding long range shooter!
