Velocity Test Results for the RWS Model 34 Full Length

Straight Shooters Use Score

Plinking	Target Shooting	Pest Control	Hunting
5	4	4	4

The RWS Model 34 has been around for a long time and has been very popular throughout its existence. It is a medium powered springer in the world of adult airguns. The RWS falls into a very reasonable price-point and is a great value for the dollar. The Model 34 is available in .177 and .22 calibers and if you aren't really sure which gun to spend your hard earned dollars on, this rifle will help you make that decision and will provide years of excellent service for you. Although rather plain in styling the finish on both the barrel and stock did not disappoint us. We found the quality to be as good as any other gun at this price-point.

.177 Caliber Pellets

H&N Baracuda 20

I recently purchased a Theoben MFR in .20. It was tuned to run on the Beeman Kodiak heavies. Knowing that these were those I bought four tins. Should have bought 8! Exceptional shooting pellet. They were also great shooters out of another .20 cal rifle I have. A custom Lothar walther barreled Crosman. So far only shot out to 50 yards. Went through a full tin in only three days of shooting.
