Reviews

FX Bobcat 25 Caliber MK-II

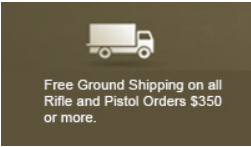

Amazing Gun, no recoil and really backyard "Noise" friendly. (Quieter than a TX200 Springer). Had to put it through a Chrony to double-check it was firing at the correct speed (it's that good!)

Griff

Velocity Test Results for the Air Arms TX200

Straight Shooters Use Score

Plinking	Target Shooting	Pest Control	Hunting
5	5	5	4

The TX200 lives up to its reputation as a superb, well-built air rifle in .177 and .22 caliber. The rifle is smooth and quiet with plenty of power for any task from field target in .177 caliber to pest control and hunting in .22 configuration. The stock is heavy but balances beautifully which makes it a stable shooting platform.

The velocity results will convince most people that the rifle has more than enough power to handle any shooting situation. We were quite pleased not only with the velocity in both calibers but also with the smooth firing nature of the rifle.

It is no wonder that the TX200 has such a good reputation for quality and accuracy in the airgunning community and is the airgun of choice for many field target competitors.

.177 Caliber Pellets
