Weihrauch HW90

-  **Gas Ram Technology**
-  **Powerful Hunting Rifle**

The Beeman HW90 uses a "gas spring" for cocking. The "gas spring" you ask? Imagine an air-filled cylinder that compresses and drives the piston forward. Unlike a pre-charged air rifle, the gas spring cannot "take a set" or tire with age. The HW90 is in your mind.

The HW90 is cocked like any other barrel single cocking stroke compresses a cylinder mainspring. When the trigger is pulled, the piston moves forward and drives the piston forward. Unlike a pre-charged air rifle, the gas spring cannot "take a set" or tire with age. The HW90 is in your mind.

Due to the extremely short lock time (the time from when the trigger was pulled to the barrel from when the trigger was pulled), the HW90 has a pronounced jolt during firing. The short lock time is a field accuracy because there is less time for the target to move.

The beech stock features the famous long-grain functionality. The trigger is crisp and predictable and is set at approximately 2 lbs. of pull, for a smooth pull. The automatic safety is located at the front of the guard and may be disengaged and then re-engaged. The HW90 is a "must-have" air rifle for the collector.

Technical Data for the Weihrauch HW90

Total Weight	8.8 lbs
Overall Length	45.3"
Stock	Right Hand **
Sights	Open Sights
Mounting Method	11mm Dovetail
Caliber	.177, .22, .25
Cocking Method	Break Barrel
Cocking Effort	Hard
Recoil Rating	Heavy
Power Plant	Gas Ram
Shot Capacity	Single Shot

**** Slight right handed cheek piece may be required for right handed shooters.**

Caliber	Velocity fps
.22	596-868

HW90

Straight Shooters Use Score

Plinking	Target Shooting	Pest Control	Hunting
3	4	5	5

If we had to come up with one word to describe the HW90 that word would be "versatile". Why? Well, a quick glance will show that the HW90 offer you a wide range of power and velocity options. Whether you are involved in target shooting or hunting there is a proper fit for you.

As most airgunners know, there is always a lot of interest in velocity. So much so, that many airgunners send their airguns off for powertunes and after-market mods to increase the power. For the velocity minded shooters, look no farther than the HW90. In .177 the HW90 literally goes supersonic with lighter pellets. Check the grids for velocities in excess of 1080 fps. One has to choose heavier pellets just to keep the velocity down to more sedate 900+ fps.

No tunes are needed with an HW90. It's all here in one package....the smoothness of a gas ram and the incredible velocity right out of the box. The .22 is well suited for any small game hunting trip. Of all the guns we sell, the HW90 is without a doubt, one of our favorite airguns.

The HW90 offers a smooth gas spring with no twang and tremendous power. Few airguns on the market can touch the HW90 in any category. Wait until you check out the performance figures on this gun.

If you are a hunter, take a serious look at this rifle. The gas ram in the HW90 make it an ideal for hunting. You can cock this gun and leave it cocked without fear of damage. In addition, this airgun is one of the few available today with a resettable safety. The HW90 will allow you to reset your safety if you are unable to take your shot. This feature alone is a big plus to those who walk the woods.

Note: We hear comments all the time from HW90 owners asking why it only rates a rating of only 3 in plinking. Well, three of the main criteria for plinking are light weight, easy to cock and fun for the whole family. Well folks as you would expect from a magnum airgun of this power, it has quite a heavy stock to dampen the recoil. It is also too difficult for younger kids to cock and they will not find it to be as much fun for casual shooting as smaller, lighter guns. That does not mean the gun is not a good plinker or target shooting. But this gun was designed for hunting and pest control which it does very well. Don't confuse this gun with a family picnic gun. This gun packs a punch. and is a howitzer.
