Gary,

Here is your new/old rifle. You will see that it's much better made than the VZ47. I included a tin of 4.4 mm balls to get you started.

Regarding the "How-to" articles - we've done them. IPI, RWS 48, R1, Hakim, FWB 124 and others were all "how to." In the R1 book, there's an entire chapter on disassembly. Look at your indexes - the back issues have what you want.

Thanks,
Tom Gaylord
